VIA E-MAIL

Dear First Official:

Subject: LED Relamping of Various State Owned Traffic Signals
State Project Nos. 0171-0449 and 0171-0458

The Connecticut Department of Transportation (Department) is developing plans for projects to replace existing LED lamps with new LED lamps at traffic signals on various State highways at State-owned intersections in various towns in District 1. The existing LED lamps have a life expectancy of approximately 8 years. This project will proactively replace lamps in order to keep traffic signals functioning in a state of good repair. Enclosed are lists of signalized locations anticipated to be included in the projects.

It is the Department's policy to notify City/Town officials and the public when such projects are undertaken.

It is important that the community share its concerns with the Department to assist in the projects' development. The enclosed media release providing information on these projects is for your use and distribution to local officials and other interested parties. It is not anticipated that an informational meeting or formal public hearing will be necessary for these projects due to the limited nature of the proposed work.

If you agree with this determination, please sign below and return it to the Project Manager, Gregory R. Palmer, at the letterhead address or via e-mail at Gregory.Palmer@ct.gov. Should you have any questions, please contact Gregory R. Palmer at (860) 594-2748 or at the email address above. If your response is not received by March 13, 2020, it will be assumed that the City/Town is in concurrence that a public hearing is not required.

Very truly yours,

Mark F. Carlino, P.E.
Division Chief of Traffic Engineering
Bureau of Engineering and Construction

Enclosure

cc: Local Traffic Authority

On behalf of the City/Town, I concur that neither a public informational meeting nor a public hearing is needed for the LED Relamping under State Project Nos. 0171-0449 and 0171-0458.

MEDIA RELEASE

FOR RELEASE: UPON RECEIPT

Traffic Signal LED Relamping in various Connecticut towns:

The Department of Transportation (Department) is developing projects to replace LED lamps at State owned traffic signals located at approximately 775 State Road intersections in various Towns throughout Connecticut. The existing LED lamps have a life expectancy of approximately 8 years. These projects will proactively replace lamps in order to keep traffic signals functioning in a state of good repair. Where applicable, these projects will also replace circular red LED lamps with red arrow LED lamps at locations that are not currently in compliance with current design requirements as well as replace existing backplates and span-mounted signs.

It is the Department's policy to keep the public informed and involved when such projects are undertaken. It is important that the community share its concerns with us to assist in the project's development. At this time, it is anticipated that an informational meeting or formal public hearing will not be necessary.

For Project 0171-0458, the project deliverables are expected to be completed in May 2020 with a tentative advertising date for construction of August 2020. For Project 0171-0449, the project deliverables are expected to be completed in June 2020 with a tentative advertising date for construction of September 2020.

Anyone interested in requesting information on these projects may do so by contacting Gregory R. Palmer, Project Manager at (860) 594-2748 or via email at Gregory.Palmer@ct.gov . Please make reference to Project Nos. 0171-0449 and 0171-0458.
